Uniting East And West

This retreat is part of the global celebrations commemorating the 100 year anniversary of Paramahansa Yoganandaji travelling to the West. In the words of Shri Guruji, "Paramahansa Yoganandaji's going to the West was a turning point in the history of spirituality, especially on the path of yoga. While the West had only heard the theory of yoga from Swami Vivekananda, Yoganandaji presented the dynamism of yoga in practice, along with yogic lifestyle, vegetarian diet, and its related concepts. His teachings shed a completely new light on India's spirituality for humanity. Kriya Yoga came out of India to the West - India presented it and the rest of the world accepted it."
